Proudest Achievements

Taking part in my marriage and raising our family. Husband is great, so are the kids.

Town Memories

MHS '50's teenagers had a very busy lifestyle. We went to the Drive-in Theaters (a chance to enjoy fresh air and good movie...) or stood in line at Wareham Theatre to really see a movie. Dragging Poyntz was an evening or afternoon occupation, either participating or watching guys in "cool" cars". We dressed the same; remember Pea coats from the Army-Navy Store? Having fun or planning fun took up a great deal of time. All this happened after we had completed our homework and attended the best school in the state. We knew it was best by the loud cheering for the basketball team, or at Griffith Field on football Friday nights. We were concerned about current affairs also, our President had a great golf game and the First Lady had "funny bangs." "The King" sang 'Love Me Tender" and we did.

Below: Ol' Girl, Ol' Man, Ol' Car (1957 Ford)—all three still going!

Career / Post High School Education

Career: Stylist/Salon Owner, 25+ years, self-employed; Licensed Real Estate Asst. for past 10 years.

I'm still working part-time as Administrative Assistant for Gary (50 years in his business), my son-in-law's business & my daughter's real estate business. "I try to keep everyone going in the proper direction, with the proper paperwork."

Post HS Education: School of Cosmetology & KS Real Estate Commission

Travel

We have lived in Manhattan all the years, traveling for family vacations, family visits, and our annual trip to our favorite place, Colorado Springs.

Manhattan & MHS in the 1950s

Thinking back on the *Fifties*, as well as visiting with others while preparing these snippets, it seems as if most of us growing up in Manhattan share many of the same memories and experiences.

We were all young and beautiful, and life was about us. I cannot help but feel that our *Fabulous Fifties* prepared each of us, in our own way, for the five decades that followed. All I can add is that I hope we "Keep Clutching the Wheel at 10 & 2" through the next decades, just as Mr. Wright taught us many years ago.
